

ENVIRONMENTAL POLICY STATEMENT

Bright Print Group provides print and related services to a mix of small to large corporations, government departments and agencies. It is committed to undertaking all operations, at its manufacturing facility at Wetherill Park, in accordance with known environmental laws and regulations. BPG is accredited to the International Environmental Standard ISO 14001.

In accordance with ISO 14001, Bright Print Group is committed to prevent pollution and to continue to improve upon aspects of its operations that have an environmental impact. This is achieved through constant management and monitoring of its environmental performance and compliance with applicable legal and other requirements. Significant impacts identified include handling and disposal of chemicals, as well as waste generation.

The Directors of Bright Print Group take full responsibility for ensuring appropriate resources are committed to maintaining its environmental management system and compliance to ISO 14001. Regular information on environmental initiatives and performance will be provided to employees, customers and any other interested parties, via our website www.brightprintgroup.com.au, or through mailouts.

Bright Print Group recognises the importance of an integrated environmental system and will audit and review the system on a monthly basis in line with developed key performance indicators and in conjunction with our commitment to the Quality Standard ISO 9001.

In addition, Bright Print Group is committed to the pursuit of sustainable environmental and operational practices. This commitment moves beyond the scope of ISO 14001 and is voluntarily undertaking to strive for best practice in all areas of sustainability.
